

Scripps to use SOZO™ in Heart Failure Study

Brisbane, Australia and Carlsbad, Calif., August 10, 2016 - ImpediMed Limited (ASX: IPD), a global provider of medical technology to measure, monitor and manage fluid status and body composition, today announced that Scripps Health will use the SOZO™ device in a validation study for monitoring patients with heart failure who are currently being tracked using pulmonary artery pressure monitoring. The validation study will provide real-world data necessary for the final design of the pivotal trial.

The study is being led by J. Thomas Heywood, MD, Director, Heart Failure Recovery and Research Program, and Andrew Accardi, MD, Chairman of Emergency Medicine. Both physicians are members of Scripps Health and ImpediMed's Medical Advisory Board. Dr. Heywood's patients at Scripps Green Hospital, part of the Scripps Health system, will be recruited for the study.

Richard Carreon, ImpediMed's Managing Director and CEO stated, "We are pleased to be partnering with Scripps Green Hospital, one of the top cardiovascular hospitals in the United States, for this exciting next step on ImpediMed's journey."
