

Clinical Support Specialist - Based in Columbus, OH Area or Indianapolis, IN Area, US

JOB OPENING:

As a Clinical Support Specialist working for ImpediMed, you will be providing clinical technical support to healthcare facilities supporting our SaaS product, SOZO®. Your professional interactions will include the most prestigious medical institutions in the US. This position is a member of the Sales Team and will work closely with other Clinical Support Specialists and Strategic Account Managers. The position will be supported by the Customer Experience team of implementation specialists.

We are looking for candidates who have a passion to meet our current and future customer expectations, while prioritizing the Company's objectives. The ideal candidate will be a superior problem-solver, be a product subject area expert and be a good listener. To be successful in this position you will need to be able to listen to the customer, be able to think on your feet, have excellent presentation skills and be tech savvy.

As a member of the Sales Team, you will be able to collaborate with your team members in a friendly and supportive environment, where ideas are freely shared, recognized and valued. We look for candidates who demonstrate our Core Values of: Integrity, Accountability, Collaboration, Respect, Quality, and Compliance.

This position is a great opportunity to join an innovative, medical technology company that is on the cutting edge of changing the future of healthcare!

ImpediMed's Company Vision: *Leave no patient untested who could benefit from our technology.*

ABOUT IMPEDIMED:

Based in Brisbane, Australia with its principal office located in Carlsbad, CA, USA and a European office in Thessaloniki, Greece, ImpediMed is the world leader in the design and manufacture of medical devices employing bioimpedance spectroscopy (BIS) technologies for use in the non-invasive clinical assessment and monitoring of tissue composition and fluid status. ImpediMed Limited is a public company listed on the Australian Stock Exchange (ASX: IPD).

ImpediMed devices are currently used in both the clinical and research settings with future applications being developed for home use. ImpediMed has over 15 years of clinical experience supporting healthcare professionals in the assessment of secondary unilateral lymphedema of the limbs. ImpediMed's devices are used in a variety of settings to aid surgeons, oncologists, therapists, and radiation oncologists. Our research devices are thought of as a gold standard measurement system for non-invasive fluid and body composition measurement, used in both animals and human research.

We were the first company to receive FDA clearance in the U.S. to aid healthcare professionals to clinically assess unilateral lymphoedema of the arm and leg in women and the leg in men, for our L-Dex® U400 device. ImpediMed's products are unique in the field of BIS which is the gold standard in bioimpedance. They scan the full frequency range from 3kHz to 1000kHz taking readings from 256 unique points. In BIS, ImpediMed has developed devices which are the most accurate and clinically useful in this field. ImpediMed is respected in the BIS field for the strong scientific foundation of its approach to BIS with over 400 peer-reviewed journal articles. ImpediMed's products are designed and manufactured to an ISO 13485 Medical Devices Quality System.

The company is advancing the state of the art in BIS technology with our new product platform called SOZO®. Only SOZO® by ImpediMed uses proprietary bioimpedance spectroscopy technology to gather and retain thousands of unique data points related to fluid status and tissue analysis, then applies indication-specific algorithms to produce accurate, detailed and actionable results in only 20 seconds. SOZO® identifies opportunities for early interventions that may

Clinical Support Specialist - Based in Columbus, OH Area or Indianapolis, IN Area, US

prevent certain conditions and slow or reverse the progression of others, resulting in better health and quality of life. A single, powerful SOZO® reading allows individualized, proactive care across multiple specialties for improved clinical and economic outcomes. SOZO® is the world's first interactive health monitor to use ImpediMed's patented bioimpedance spectroscopy (BIS) technology to monitor a person's fluid status and tissue analysis.

ImpediMed produces a family of FDA cleared and CE Marked medical devices, including SOZO®, sold in select markets globally. For more information, see our website at www.impedimed.com.

ImpediMed's management team includes executives who have international experience in successfully introducing innovative medical products to global markets. The organization is dynamic and professional and has been built from the ground up with a strong team of enthusiastic and dedicated senior managers, researchers and employees. The company is on a dramatic growth path with the strong demand for its unique product offerings and offers exciting career opportunities.

ImpediMed's Company Vision: *Leave no patient untested who could benefit from our technology.*

POSITION SUMMARY:

Provide clinical demonstrations and instruction for use of ImpediMed products in pre-sale, implementation and post-sale situations in formal education as well as small group or individual presentations in patient care areas throughout a healthcare facility, to gain or increase acceptance and utilization of ImpediMed products and technology.
